

Raja Babulal Mourya

Cybersecurity — Digital Forensics — VAPT

Vadodara, Gujarat — +91-9834209990 — rajamourya915@gmail.com

LinkedIn — GitHub — TryHackMe — Portfolio

Professional Summary

Cyber Security graduate with hands-on experience in Vulnerability Assessment and Penetration Testing (VAPT), Digital Forensics, and Incident Investigation through work with the Vadodara Cyber Cell. Skilled in identifying and validating security vulnerabilities, conducting forensic analysis, and supporting cyber fraud investigations. National Finalist at India Innovates 2026.

Education

Parul University

B.Tech Computer Science Engineering (Cyber Security)

Vadodara, Gujarat

Aug 2022 – May 2026

B.N.N. College

Higher Secondary Certificate (Class XII)

Bhiwandi, Maharashtra

2020 – 2021

Experience

Cyber Security Intern

Jul 2025 – Dec 2025

Vadodara Cyber Cell

- Conducted 5+ end-to-end VAPT engagements on web applications and internal networks for active cyber fraud cases; documented findings with CVSS severity scores and PoC evidence used directly by investigators.
- Identified 10 vulnerabilities in the top 10 categories of OWASP and prioritized findings using CVSS severity scoring.
- Assisted in 5 cyber fraud investigations: performed forensic acquisition using FTK Imager, conducted disk and memory analysis via Autopsy and Volatility, prepared evidence documentation compliant with Indian IT Act Section 65B.
- Delivered professional penetration testing reports with executive summaries, technical PoC screenshots, CVSS scores, and step-by-step remediation guidance consumed directly by Cyber Cell investigators and legal teams.

Projects

KAVACH AI — GitHub

- National Finalist, India Innovates 2026 (10,000+ teams) as Team Leader & System Architect.
- Built AI-powered cybercrime detection platform: deepfake detector (ResNet-50, 91% accuracy), multilingual phishing URL classifier (IndicBERT, 15 Indian languages), and AI voice clone detector.
- Designed end-to-end system architecture and deployed via FastAPI, Docker, and Redis with sub-200ms inference latency; integrated CI/CD pipeline for seamless updates.

Active Directory Security Lab — GitHub

- Built an Active Directory security lab for attack simulation, detection engineering, and security hardening.
- Performed Kerberoasting, AS-REP Roasting, Password Spraying, BloodHound enumeration, and ACL abuse in an isolated environment.
- Developed detections using Windows Event IDs 4768, 4769, and 4625 with Sigma rules, Splunk, and Microsoft Sentinel.
- Implemented security controls including LAPS, gMSA, auditing policies, and MITRE ATT&CK-based defense validation.

Achievements

- **National Finalist, India Innovates 2026** — Team Leader & System Architect of KAVACH AI (10,000+ teams nationwide).
- **3rd Place, HASBL CTF 2025** (150+ teams) — solved challenges in cryptography, reverse engineering, and network forensics.
- **4th Place, VNR Hackathon** — cybersecurity track.

Technical Skills

Security: VAPT, Web App Security, Network Pentesting, OWASP Top 10, Active Directory, Kerberoasting, AS-REP Roasting, BloodHound, OSINT, Red Teaming

Tools: Burp Suite, Nmap, Metasploit, Nuclei, OWASP ZAP, BloodHound, Splunk, Microsoft Sentinel, Wireshark, Autopsy, FTK Imager, Volatility

Tech: Python, FastAPI, Docker, MongoDB, Redis, Git

Certifications

- Certified Ethical Hacker (CEH) — EC-Council
- Digital Forensics Essentials (DFE) — EC-Council
- Linux Certified Investigator — CSI Linux
- Digital Forensics — Charles Sturt University, Melbourne, Australia
